## What should the participants of the enmacc platform know about your company?

EWE TRADING GmbH, based in Bremen, is a 100% subsidiary of EWE AG in Oldenburg and is responsible for trading all energy commodities, in particular portfolio management for the EWE Group's energy portfolio. We trade power and gas, standard products, profiles and structured products and are active in all German market areas and TTF. In addition, we market power directly from wind, PV and biogas.

## What do you expect from enmacc?

The platform offers us growth opportunities in bilateral trading of power and natural gas. It brings together existing and new trading partners - and in future will also increasingly be used for trading in guarantees of origin (HKN).

## **Which products are you primarily interested in?**

We trade in power, gas and guarantees of origin.

## **Are you interested in getting to know new trading partners?**

Yes, we are very interested in new trading partners!

## **On what contractual basis can you become your trading partner?**

The contractual basis is EFET and we are happy to recommend our simplified framework trading agreement (EFET light).

## **Who is the contact person in your company responsible for new trade relations?**

Please contact Martin Fülbier (Tel. +49 421 69 625 350, [m.fuelbier@ewe.de](mailto:m.fuelbier@ewe.de)).

## **Would you like to contact companies with whom you do not have a framework agreement, and show indicative quotations?**

Please do not hesitate to contact us. The goal should be a framework agreement.

## **Does your company have an innovative product or a special Service?**

Yes: Products - PPA, flexibility, balancing power energy, guarantees of origin.  
Services - Generation Portfolio Management etc. Feel free to contact us!

## **What should other enmacc participants know about your team?**

Bremen has always been a popular hotspot - our traders see the long trading tradition at the power and gas desks every day when they look out from the 21st floor at the overseas city. To find happiness in Bremen, many took on long sea trade routes. Others performed real tricks - like the Bremen Town Musicians, who have a firm place in the history of the lively city. We want to make it easy for them - for example about enmacc: We are happy about new contacts and many, new trade partners!
